***Election of Species***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, figures 1-8, relates to a duplexer having a U-shaped core dielectric block with a bridge through-hole electrode extending between a transmit arm and a receive arm.

Species II, figures 10 and 11, relates to a duplexer having a U-shaped core dielectric block with a bridge electrode in a groove extending between a transmit arm and a receive arm.

Species III, figure 12, relates to a duplexer having two separate core dielectric materials are bonded, and two separate bridge through-hole electrodes for a transmit arm and a receive arm.

Species IV, figure 13, relates to a duplexer having two separate core dielectric materials are bonded, and two separate bridge electrodes in a groove.

Species V, figure 14 and 15, a duplexer having a rectangular parallelepiped dielectric block with a slot diving the core into a transmit branch and a receive branch, and a bridge through-hole electrode extending between a transmit arm and a receive arm.

Species VI, figure 16, a duplexer having a rectangular parallelepiped dielectric block with a slot diving the core into a transmit branch and a receive branch, and a bridge electrode in a groove extending between a transmit arm and a receive arm.

Art Unit: 2817

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2817

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
